**Who can apply?**

In Argentina, universities and research centres dispose of their own financial resources and are free to fund the international projects they consider relevant and according to their individual institutional funding regulations.

Therefore, the Argentinean partners must provide the Call Secretariat with a **signed official letter of support** from their Head of Department, Dean, or equivalent position, **stating the commitment of their institution to provide its own funding**.

**This letter must be included as an annex** at the end of the proposal submission form.

**Call contact point:**

**Paula Brennan**
